Gillespie Electric's Mission Statement

We are committed to providing high quality construction services, guided by the principles of Merit Construction and Free Enterprise, to both public and private markets. It is our goal to establish and maintain a reputation for excellence in our work, for fair and competitive prices, and for a superior degree of responsibility and competence on the part of every member of the company.

Knoebels Family Fun Day

This year we would like to invite all the employees and their families to Knoebels for the day. We are scheduled for Saturday, June 27th but do need at least 50 people to attend. Please let **Amber or Lisa** know if you are interested and approximately how many will be attending. There are cabins and campsites available to rent for anyone who wants to stay the weekend but they do go fast. Please check out the Knoebels website for camping info, www.knoebels.com.

IMPORTANT Dates To Remember

- Feb. 27th
Safety Committee
Meeting 7:00 am at
the Office **All
Are Welcome**
- March 27th
Safety Committee
Meeting 7:00 at the
Office "All are
Welcome."
- March 30th
Foreman's Meeting
3:30 pm
- April 3rd—Closed
Good Friday!

Winter Safety from OSHA

Winter weather brings a whole new set of challenges for staying safe. As the largest storm of 2015 pounded the Northeast with record breaking snowfall in some areas, we would like to pass along some outstanding reminders of winter safety that was recently published by Occupational Safety and Health Administration (OSHA). We all know that the weather at this time of year – especially today in the Northeast – can create a variety of hazards that can significantly impact everyday tasks and work activities. These hazards include slippery roads/surfaces, strong winds and environmental cold..

OSHA offers the following winter-weather tips for workers and employers:

- Assume all power lines are energized and stay well clear of any downed or damaged power lines
- Make certain all powered equipment is properly guarded and disconnected from power sources before cleaning or performing maintenance
- Use caution around surfaces weighed down by large amounts of snow or ice

Scoop small amounts of snow and use proper lifting form to avoid over-exertion or injuries

Clear walking surfaces of snow and ice and use salt or its equivalent where appropriate

Employers should provide and ensure the use of fall protection and provide and maintain ladders

Stay in the vehicle – do not leave the vehicle unless help is visible within 100 yards

Wear reflective clothing, and eye, face and body protection

Establish and clearly mark work zones
Use engineering controls, personal protective equipment and safe work practices to reduce the length and severity of exposure to the cold

Please be safe when you travel in winter weather. For more OSHA winter safety tips you can visit their website at https://www.osha.gov/dts/weather/winter_weather/index.html.
